

VMO

Mobile Phone Video Map Overlay

Instant Video Surveys

VMO creates instant video surveys. There is no post processing required. All survey parameters are created whilst recording.

Video File and GIS Data

Your video survey and a CSV file with GPS coordinates, survey name and project data are exported to your mobile phone file directory for upload to your PC or preferred storage cloud.

Analysis and Reporting

The video survey file and GPS CSV file can be used to review, analyse and report on video findings. This includes creating an issues or defect log to create a GPS based works program.
